Mobile No. : +91-790-801-5851

## SUMMARY

---

- Profound knowledge in MERN stack development.
- Project **vite-mern-template** has been mentioned in the official and very popular open-source project ([vitejs/awesome-vite](#)) on GitHub for creating MERN stack template using ViteJS.
- Contributed in several open-source projects on GitHub.
- Experience with Agile software development workflow.
- Recognised good team player and awarded for interpersonal skills by current employer.
- Presently studying M.Tech. in Computer Software Engineering under BITS Pilani WILP.

## SKILLS

---

- **Programming Languages** - HTML, CSS, JavaScript, Node.js, TypeScript
- **Frameworks** - React, Next.js, Astro, Tailwind CSS, Express
- **Tools** - Git, GitHub, Atlassian Stack, ViteJS, Docker, Postman
- **Database** - MongoDB
- **Cloud** - Amazon Web Services

## PROJECTS AND TRAININGS

---

- **Portfolio Website** - <https://www.anuragp.dev/>  
(Jul'22 - Aug'22)
  - This is a fully responsive personal portfolio website initially built with React and Tailwind CSS.
  - Consequently, the website has been redesigned and modified with SEO and SSG with Next.js.
  - Git has been used as a version control system and it has been published to GitHub - **Repo Link**.
  - Vercel deployment platform has been used to host the website with a customised domain.
  - The website has been integrated with Vercel Analytics.

- Currently working on implementing a backend CMS service like [sanity.io](https://sanity.io) and NoSQL database like MongoDB.
- **Digital Resume** - <https://apicgg.github.io/digital-resume/>  
(Aug'22 - Sep'22)
  - This is a resume website built with HTML, Tailwind CSS and JavaScript.
  - The website has both light and dark mode which is also being maintained from user's last visit preference using localStorage (Browser API).
  - The website has been published as a public repository ([Link](#)) on GitHub and hosted on GitHub pages using Jekyll.
- **Bio Link** - <https://apicgg.github.io/bio-link/>  
(Oct'22)
  - Simple responsive static website for link-in-bio page with HTML, CSS and Vanta.js.
- **vite-mern-template** - [Link](#)  
(Jul'22)
  - This is a MERN stack template with React, Redux Toolkit, TypeScript and ViteJS as the frontend tooling and also have received several stars on GitHub.
  - The repo has been mentioned and being used as a production ready template in ViteJS's official GitHub repo.
  - GitHub Actions has been integrated to keep the node dependencies updated via dependabot.
- **Neovim IDE** - [Link](#)  
(Oct'22 - Nov'22)
  - This repository contains Neovim config file for a web development IDE written in Lua as per my personal taste in IDE.

## PROFESSIONAL DETAILS

---

- **Software Engineer** (Feb'19 - Present)  
Tata Consultancy Services
  - To develop and manage applications that are used for research and development in medicinal and translational science for a pharmaceutical client.
  - Developed an application dashboard with React and Tailwind CSS for IT research team.
  - Contributed in developing an application landing page and integrating the frontend with authentication backend in micro service architecture.
  - Deployed few research applications within AWS infrastructure using EC2 service and CloudFormation as IaC.

- **Assistant Engineer Trainee** (Dec'18 - Jan'19)

Tata Consultancy Services

- Interactive Initial Learning Program on full stack software development, linux and cloud technologies.

## ACADEMIC DETAILS

---

- KIIT University  
B.Tech in Electronics and Electrical Engineering, 2018
- BITS Pilani WILP (Work Integrated Learning Program)  
M.Tech in Computer Software Engineering, 2023

## CERTIFICATES

---

- **React Front to Back 2022 - Udemy**  
Certification Link - [Link](#)
- **Git Learning Journey - Learn Git (Version Control)**  
Certification Link - [Link](#)
